## Agenda-items

- Stand-up meeting
- After the admin add an activity during the administrative interface, the activity should be saved in the database or the json file or both.
- For the requirement "as a player, I want to be able to specific the server I want to connect to, so I can play with different people." Does that mean the server should be able to run on flexible url too?
- Merge request:
    - Check and approve the merge request more frequently
    - Use the judge system to provide feedback
    - Check and ready for fix the pipeline fail after merge.
- Test:
    - Any Altered method/ new method in the backend should have test.
- Further questions and proposals
