Agenda week 7

Location: Cubicle
Datum: 22/03/2022
Time: 4:45
Attendees:

     Robert Andrei Boboc

     Oana Madalina Fron

     Khalit Gulamov

     Atanas Kichukov

     Renyi Yang

     Tim Appelman

Agenda-items

- Stand-up meeting
- Proposal 1 (workflow): we can have a "develop" branch, we check out from develop branch to solve issues, and merge it back to develop. Every week we merge develop to main. And we push small things (small fix to let the project work, uploading agenda and minute) directly to the branch.
- Proposal 2 (project structure): delete all files/lines of code about the Quote example. Delete all merged branches. (upload the original quote example as a branch)
- Proposal 3 (issues): create checkboxes BEFORE starting to solve the issue, and make them checked when having the merge request. Items checkbox should be explained based on the code functionality(which class/method you are going to create and what it can do), and comments under that issues if you think such design is unreasonable.
- Proposal 4(gitignore) ignore the .DS_store and quiz.trace.db
- Further questions and proposals
